

Day 01 - Introduction to AI Concepts

Platform: Microsoft Learn

Module: Introduction to AI Concepts

Status: Completed

Learning Objectives

Understand AI, prompt writing, information extraction, image analysis, and AI in cybersecurity.

What is Artificial Intelligence?

Artificial Intelligence (AI) is the ability of computers to perform tasks that normally require human intelligence such as learning, reasoning, problem-solving, understanding language, and recognizing images.

What I Learned Today

1. Basic Prompt Writing

Clear and specific prompts produce better AI responses.

2. Information Extraction

AI can summarize large documents and extract important information quickly.

3. Image Analysis

AI can analyze images, identify objects, read text from screenshots, and explain visual content.

AI in Cybersecurity

AI supports malware detection, phishing detection, log analysis, threat hunting, incident response, and security automation.

Interview Question

Q: What is Artificial Intelligence?

A: Artificial Intelligence is the ability of computers to perform tasks that normally require human intelligence.

Today's Summary

Today I completed the Microsoft Learn module 'Introduction to AI Concepts' and learned prompt writing, information extraction, image analysis, and AI applications in cybersecurity.
